Connect to the Internet.

We recommend use of a LAN cable (sold separately) for a more stable network connection. If you prefer to use a wireless connection (Wi-Fi), don’t connect a LAN cable.

Connect to your TV.

Make all connections before plugging the AC power cord into an electrical outlet.

Connect your DUALSHOCK®4 wireless controller to your system using the USB cable, and then press the (PS) button. Your controller pairs with your system and turns on.

Make it your own.

You’re almost done! Follow the on-screen instructions to set up an Internet connection, set the date and time, and configure other settings - then select [Start Now] from the setup screen.

After you set up your Internet connection, a system software update may automatically download. Future updates will improve performance and add new features.

Will a child be using your PS4™ system? If so, be sure to read the “Parental controls” section.

To later change any settings that you skipped, select (Settings) from the function screen.

This manual describes the use of games that have age limitations. For details on the type of age ratings, refer to “Parental control level” in the User’s Guide.
