Let's get started

Connect to your TV.

1. Turn on your TV and set the input to HDMI.
2. Turn on your PS4™ system by pressing the (power) button.
3. The power indicator blinks blue, and then turns white.

Connect to the Internet.

- We recommend use of a LAN cable (sold separately) for a more stable network connection.
- If you prefer to use a wireless connection (Wi-Fi), don’t connect a LAN cable.

Connect to your TV.

Follow the steps below to connect your PlayStation®4 system to your TV. Use the supplied HDMI cable for the connection.

Connect your DUALSHOCK®4 wireless controller to your system using the USB cable, and then press the (PS) button.

Your controller pairs with your system and turns on.

Make it your own.

You’re almost done! Follow the on-screen instructions to set up an Internet connection, set the date and time, and configure other settings - then select [Start Now] from the setup screen.

After you set up your Internet connection, a system software update may automatically download. Future updates will improve performance and add new features.

Will a child be using your PS4™ system? If so, be sure to read the “Parental controls” section.

Get the most out of your PS4™ system by connecting to the Internet. You’ll be able to play games online and connect with Friends.*1

If your TV does not display a picture when the power indicator turns white, restart your system. Press the (power) button for at least 7 seconds to turn off your system, and then turn it on again.

• You’ll need to pair a controller when you use it for the first time and when you use your controller on another PS4™ system. If you want to use two or more controllers, you must pair each controller.

• After you’ve paired your controller, you can disconnect the USB cable and use your controller wirelessly.

• It’s possible to use up to four controllers at the same time. When you press the (PS) button, the light bar glows in your assigned color. The first controller to connect is blue, with subsequent controllers glowing red, green, and pink.

To later change any settings that you skipped, select [Settings] from the function screen.

Parental controls

- You can restrict the use of games that have age limitations by setting the parental control level according to the following table.

<table>
<thead>
<tr>
<th>Parental control level</th>
<th>Approximate age of user</th>
<th>Game rating labels</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>3</td>
